

## JMQ930 Automatic High-Speed Roller Die Cutting Machine

### JMQ930 Automatic High-Speed Roller Die Cutting Machine

#### **Description of JMQ930 Automatic High-Speed Roller Die Cutting Machine**

JMQ930 Automatic High-Speed Roller Die Cutting Machine is the professional equipment for cutting various kinds of popular paper and PE coated paper, which is applicable to printing, packaging, paper cup and other paper container fields. Under the traction of step motor, reel paper is fed to the die cutting area; Cutting length can be set in touch screen which is convenient and precise. And it can die cut the blank paper and printed paper. Clutch is pneumatic, which is fast and reliable.

#### **Technical Specification of JMQ930 Automatic High-Speed Roller Die Cutting Machine**

Model	JMQ930
Press Mark Maximum Area	930×670mm
Press Cut Line Length	≤8m
Working Speed	65times/min
Main Motor Power	7.5KW
Applicable Paper	150~450g/m <sup>2</sup>
Air Source	1.0m <sup>3</sup> /min; 0.8MPa
Weight	3.5T
Dimension	4550mm×2100mm×1700mm
