

PYQ202C Die Cutting Machine

PYQ202C Die Cutting Machine

Description of PYQ202C Die Cutting Machine:

PYQ202C die cutting machine is used for cutting various kinds of popular paper plate, corrugated board, plastic piece, leather products, which is suitable for printing, packaging, upholster and plastic fields.

Main Structure Characteristics of PYQ202C Die Cutting Machine:

The mainframe adopts high-grade material with high intension of shaping and reliable monolithic electromagnetic clutch. The operating height is reasonable and the press shelf opening angle is big. The electric machine was designed with IEC standard, single piece press cutting, continuously press cutting, time delay (the range can be adjusted) and credible and secure protection system.

Technical Specification of PYQ202C Die Cutting Machine

Model of Machine	PYQ-202C
Press Mark Effective Area	930x670mm
Working Speed	23±2
Press Cut Line Length	< 25m
Electric Machine Power	4kw
Total Weight	3000kg
Case Dimension	1850x1650x1700mm
